

On March 16, 2005 from 12:37 AM and every 15 minutes til 1:07AM I received 3 phone calls from some companies automated dialers. The phone number on My caller ID was 913-981-4284. I returned a call to that number and asked for someone to call me but know one has. My family does not appreciate being woken in the middle of the night by some telemarketing automated dialing system that someone forgot to turn off. At least they could do is return a call and appoligize for the inconvenience. I owuld liketo hear back form someone regarding this matter.
